Many patients may have a misaligned bite and aren't aware! Misaligned bite may or may not cause the following symptoms of TMJ (temporomandibular joint dysfunction).

Symptoms (**Circle all that apply**)

Headache	TMJ joint pain
TMJ noise	Limited opening
Ear congestion	Vertigo (dizziness)
Tinnitus (ringing in ears)	Dysphagia (difficulty swallowing)
Loose teeth	Clenching/bruxism
Facial pain	Tender sensitive teeth (percussion)
Difficulty chewing	Cervical pain/neck pain
Postural problems	Paresthesia of fingertips (tingling)
Thermal sensitivity (hot/cold)
